## Save the Date: Press conference of the Global Food Summit on 25 March 2020 in Munich

### Foodtropolis: Urban.Circular.Food. - Which changes do we have to prepare for in food production?

Berlin/Munich, February 10, 2020: The Global Food Summit 2020 will hold a press conference at the Presseclub Munich on March 25, 2020.

Ladies and gentlemen,

Proverbially extract protein from the air - from CO<sub>2</sub>, hydrogen and electricity? Or from discarded crab and lobster shells? Vegetables without arable land and sun? All this already exists, is ecological and extremely sustainable.

Food waste materials are becoming new raw materials for a sustainable recycling economy, supported by artificial intelligence in autonomous farms. The robotic farmer on the indoor field: will this remain fiction or will it become everyday life? What changes do we have to prepare for?

These are the topics of our press conference. Our speakers are:

**Lim Chuan Poh**

Chairman of Singapore Food Agency

**Dr. Máximo Torero Cullen**

Assistant Director-General, Economic and Social Development Department (ES) of the Food Agriculture Organization (FAO), Rom

**Stephan Becker-Sonnenschein**

Head and Founder Global Food Summit

**Solar Foods, Finnland (tbc)**

**Metabolic, Niederlande (tbc)**

**ON:** March 25, 2020

**AT:** 10 am

**Where:** Presseclub München

Marienplatz 22

80331 Munich

There are no parking spaces available: Please use the S- and U-Bahn to Marienplatz.

## Global Food Summit – Lending a voice to the future of food

In growing metropolitan regions, the population expects to be able to age healthily and demands that the sustainability targets for 2030 will be taken into account along the food chain. We can achieve these goals with new methods and technologies, but these will change dramatically what and how we eat.

Every year, the Global Food Summit brings together experts from science, industry, associations, politics and the media to discuss how new technologies will affect the way of life. A collaboration of University of California, Berkeley, Wageningen University, Bavarian State Government, Technical University of Munich, National Academy of Science and Engineering and Global Food Summit. The Summit will take place on 25 and 26 March 2020 in the Munich Residenz.
